

DIGITAL GROWTH • PRACTICAL LEARNING

Dr. Shubhendra Gupta

Digital Marketing Trainer, WordPress Developer & AI-
Assisted Marketing Practitioner

A PRACTITIONER WHO TEACHES

Building digital systems—and helping people understand how they work.

“Hands-on, industry-oriented learning grounded in live websites, campaigns and measurable outcomes.”

Digital Marketing Trainer with practical experience across SEO, WordPress development, Meta Ads, organic lead generation and conversion optimization.

As Director of Learn2Earn Labs, Dr. Gupta combines training, curriculum design and project mentoring with active responsibility for websites, content strategy, SEO and lead-generation systems. AI tools support research, content development, campaign planning and teaching—always with human verification.

PROFESSIONAL JOURNEY

Leadership, delivery and continuous practice.

2019 — PRESENT

Digital Marketing Trainer & Director · Learn2Earn Labs

Leads hands-on training for students, job seekers, entrepreneurs and professionals while managing the organization's digital presence, SEO, content and lead generation. Develops curricula, assignments and live projects across SEO, WordPress, Meta Ads, analytics and AI-assisted workflows.

INDEPENDENT PROJECTS

WordPress Developer & Digital Marketing Consultant

Builds responsive, SEO-friendly and conversion-focused websites across education, research publishing, e-commerce, jewellery and industrial sectors. Translates client objectives into website structures, content strategies, enquiry paths and measurable campaigns.

INSTITUTIONAL ENGAGEMENT

Trainer, Workshop Facilitator & Project Mentor

Delivers practical programs with colleges, universities and organizations. Adapts material to learner level and duration, evaluates work through presentations and live tasks, and connects classroom learning to employment, freelancing and business promotion.

OPERATING PRINCIPLE

Teach from real systems.
Measure what matters.
Improve through evidence.

Course content is updated alongside changes in digital platforms, AI tools, advertising practices and industry expectations. Learners build websites, landing pages, SEO strategies, campaigns and portfolios—not just notes.

WORDPRESS • SEO • CONTENT • LEAD GENERATION

Turning a training website into an organic acquisition engine.

400+

pages developed and managed

97

published blog posts

25K

organic visits in 2025

The brief

Create and manage a platform that supports both online and offline course discovery, communicates value clearly, captures enquiries and compounds visibility through search.

The work

- Website architecture and WordPress development
- On-page SEO, keyword optimization and internal linking
- Content publishing and blog operations
- Contact forms and learner enquiry systems
- AI-assisted research, planning and page development

The outcome

The combined system generated approximately 1,000 organic leads and converted around 120 of them into paying customers.

Illustrative funnel based on reported approximate totals.

STRUCTURED INFORMATION

Complex content, made findable and actionable.

SCHOLARLY PUBLICATION

A research publishing platform built for authors—and indexing.

scholarlypublication.com

Developed journal, volume and issue structures for Radius, Commercia and Yatharth. Implemented Dublin Core and customized metadata to support Google Scholar indexing, alongside on-page SEO and dynamic submission forms.

- Research article and book-publishing workflows
- Journal-wise, volume-wise and issue-wise taxonomy
- Author, editor and administrator-oriented structure
- Article submission, proposal and enquiry forms

SKILLS PERSONIFIED

A smoother path from course discovery to purchase.

skillspersonified.com

Developed a WordPress and WooCommerce platform for communication-skills courses using Blocksy, conversion-focused page structures and AI-assisted content planning.

- Course and service landing pages
- Calls to action and enquiry pathways
- WooCommerce purchasing system
- Customer-journey and conversion improvements

01 · Discover

Search and content attract the right audience.

02 · Understand

Clear structure reduces information friction.

03 · Trust

Metadata, proof and usability build confidence.

04 · Act

Forms and commerce paths enable conversion.

META ADS • LANDING PAGES • CONVERSION OPTIMIZATION

Improving campaign efficiency through analysis and iteration.

idhani.in • Gurugram

Contribution

Analysed campaign performance, conversion rates, audience response and advertising results. Contributed to audience targeting, campaign structure, creative strategy and landing-page recommendations.

- Diagnosed performance gaps using campaign data
- Developed conversion-focused landing-page strategies
- Refined audience and campaign structure
- Prepared practical optimization recommendations

Reported result

Approximately **₹6 lakh** in Meta Ads expenditure worked on during 2026.

THE LESSON

Campaign performance is not only an ad problem. Audience, creative, offer and landing-page experience work as one system.

TEACHING PORTFOLIO

Practical learning designed around real outputs.

Digital Marketing

SEO, WordPress, content marketing, Meta Ads, social media, organic lead generation and analytics through live demonstrations and business examples.

WordPress Development

Installation, planning, responsive pages, Elementor, WooCommerce, Blocksy, forms, SEO plugins, performance and maintenance.

SEO & Content

Keyword research, search intent, site audits, metadata, internal linking, blog planning, organic traffic and conversion strategy.

Meta Ads & Leads

Objectives, targeting, creatives, campaign structure, CTR, conversion rate, cost per result, ROAS and landing-page improvement.

AI-Assisted Marketing

Responsible use of ChatGPT, Gemini and Claude for research, content, keyword planning, ad copy, audience analysis and website workflows.

Institutional Programs

Level-appropriate workshops, project-based learning, live tasks, assignments, presentations and industry-oriented assessment.
